Bachelor of Science in Computer Science
University of Santo Tomas, 2012

Professional Summary:

Software Engineer building customer-facing and internal features across 2+ platforms, including mobile and web products. Delivered **REST APIs**, 2+ features per cycle, 15+ bug fixes per month, and performance improvements and business applications while supporting full-cycle development from planning through deployment. Comfortable switching between client-side and server-side work in fast-moving release environments.

Key Skills:

Technical
- Angular / React Vite / Vue
- PHP / Python / Laravel
- Sql / UI CSS/ Boostrap Tailwind
- Reactive & template-driven forms
- REST API integration

Engineering Delivery
- Agile and scrum methodology
- PR-based code review
- Azure Tfs / GIT CI CD / AWS
- UI-architect review cycles
- Cross-team delivery across shared enterprise codebase

Business Intelligence Tools
- Power BI
- Power Query

Business Intelligence Development
- DAX
- Data modeling

Data Integration
- Data transformation

Data Quality
- Data validation

AI
- Automation / N8n /Make
- Claude Code/ Copilot
- AI Integration / LLM / RAG

Work Experience:

Software Engineer (**9** Years) **July 2017 – August 2026**
RealPage Philippines, Inc.

- Led UI migration of the Eviction Management module from a legacy system to Angular, including document review, email workflows, and 3rd-party API integration
- Developed Dashboard and Reports for every sprint via Power BI
- Drove platform-wide migration from feature-flag-based to activity/permission-based access control
- Resolved production defects (form validation, navigation, accessibility) across property-management workflows, working through structured PR and UI-architect review cycles

Software Developer (**2.5** Years) **June 2014 – February 2017**
Klab Cyscorpions

- Developed and maintained for game applications (Android), for both client-side and server-side components.
- Implemented bug fixes, performance improvements, and new features to support regular content updates.
- Participated in full-cycle game development, from requirements gathering and technical planning to production deployment and post-release support. (Python)

Software Developer **(1 Year) January 2013 – June 2014**
Gulliver Integrated Outsourcing

- Provided technical support and development assistance for clientele platforms, ensuring system functionality.
- Participated in the design, research, and development of mobile application solutions, contributing to feature planning and technology evaluation.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot issues, and implement software enhancements.
